PURPOSE OF THIS SERIES

This is one of a series of technical papers in which are listed the names and addresses of persons known to FAO to be conducting research on, or interested in a particular subject within the general field of aquatic sciences and fisheries research. Each list is extracted from the Register of Experts maintained in Fisheries Biology Branch. This register consists of a set of edge-notched cards based on Information Forms which have been completed and returned by corresponding scientists. Appended indexes to the list are prepared according to the information entered on the cards, which may be sorted according to place of residence, language facility, subject fields of experience, species group studied and other attributes.

The first version of a list is prepared from names already in the Register of Experts to which may be added other names such as the authors of documents entered in the Current Bibliography for Aquatic Sciences and Fisheries dealing with the particular subject, as indicated by its Taxonomic and Subject Indexes.

The first, and each subsequent, version of a list is revised by sending a copy to each person named in it with a request for suggestions for the names of additional persons to whom information forms are subsequently sent and by sending out special information forms designed to bring in information for updating the first version.

Entries in the list are numbered serially, and these numbers are used for reference in the indexes, which follow, where possible, the codes used in the Current Bibliography indexes. The names and addresses are set out in such a way that they can be cut out and used for index cards or mail labels. Extra copies of lists can be obtained by application to:
